INSIDE / **Guided workflow**

THE WORKFLOW, A TAILORED PROCESS

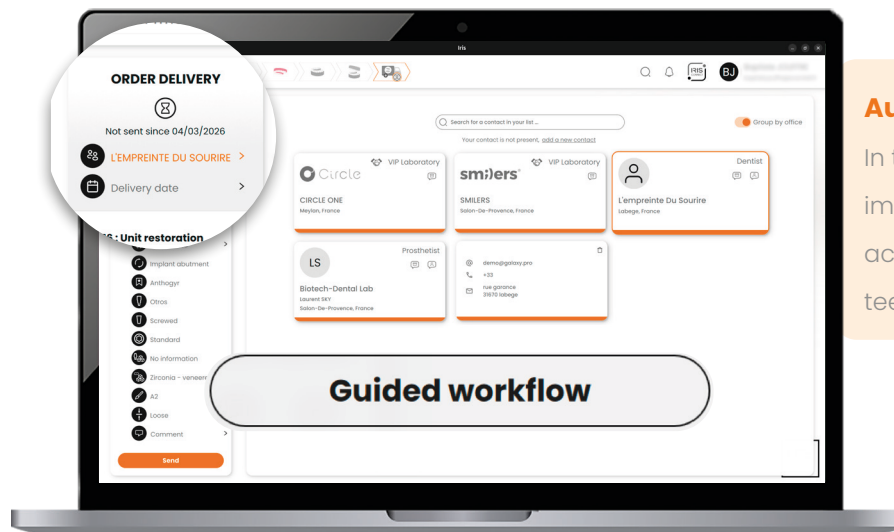

Edit the prosthetic file > Maxillary scan > Mandibular scan > Occlusion scan > Send order.

The workflow corresponds to the different steps required to send an order : from creating the prosthetic file to sending the selected scans.

INTELLIGENT GUIDANCE

The guided workflow automatically assists you according to the treatment selected in the prosthetic file. Each type of procedure triggers the scanning steps required for the order : all you have to do is follow the process.

Automatique AI implant

In the guided workflow, the AI implant function is automatically activated for the implants and teeth concerned.

Why use the guided workflow ?

Time saving

Each step is predefined according to your clinical needs.

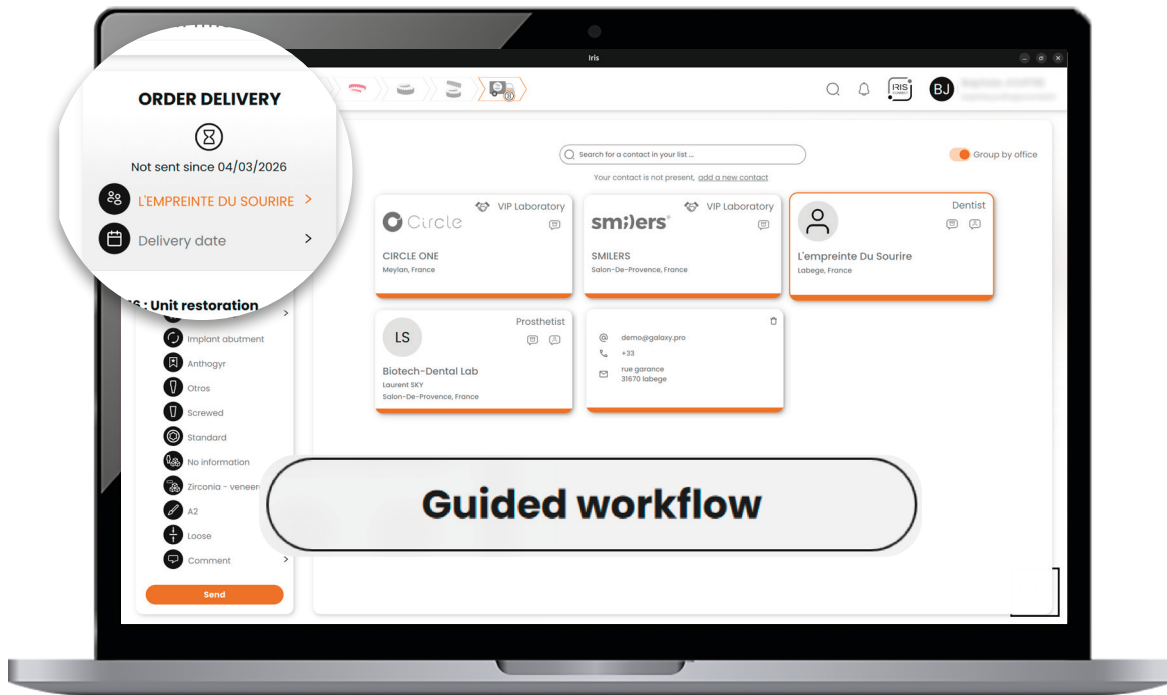

Basic reliability

Follow the logical flow of the treatment, without interruption or omission.

Customization possible

Add additional scans at any time.

CREATE A GUIDED ORDER

From the patient file or the "Orders" tab, click on "New order."

Choose the laboratory of your choice*, fill out the prosthetic form, select the guided workflow, and perform **all the necessary scans that are automatically suggested** : you will be guided through the order until it is finalized.

*For more information on adding an external contact, refer to the file [*INSIDE / My partners.*](#)

IRIS CONNECT keeps you informed.

Dates, exchanges, tracking : everything is centralised and updated instantly. Chat directly with laboratories from the IRIS BY STARCK® CONNECT interface. Smart notifications keep you informed of order progress.
